Quick Summary

The player has to find clues to solve the mistery.

Overview

- The Player begins outside the house. There we learn the basics of player movement. From there, The Player enters the house. Inside the house, The First sight the player gets is of a long hallway, from which 5 doors can be seen, but only 2 are opened. Inside the first one on the right, there is a kitchen and a dinner table, inside the third one on his right, can be seen an adult's room, this room has a bathroom. The first and second on the left are locked. The remaining one on the right, the second one, is a jammed door that leads to the kitchen. Inside the kitchen, The Player will find a light bulb that, upon taking it, can be placed inside a toy in the adult's room. When placed, the whole house loses power, the only thing that helps The Player see is his flashlight and sources of light outside the house. The toy glows and starts to sing. From there the player proceeds to find a key inside the bathroom, this key opens the kid's room. Mannequins start to appear throughout the house. From further inspection, The Player notices that the wardrobe can be moved, and behind it, a hallway leading to a basement can be seen.

Objective Summary

- Find the light bulb.
- Find the key.
- Push the wardrobe.
- Explore the Basement.

Theme, Setting and Location

- Abandoned House
- Night
- Mistery
- Dark

Art Style

- The Art is based on early 3D graphics
- Low-res textures
- Pixelated

Dominant
